

# Access and Delivery of IP Protocols For Lawful Interception

Criminals today are increasingly using Internet media to facilitate illegal business because of its instant availability, its simplicity, and the belief that most Internet transmissions are not being intercepted by law enforcement agencies. New laws are being implemented worldwide which will reverse this trend. Internet Service Providers (ISPs) will soon be required to provide communications interception services to law enforcement agencies. STAR-GATE is the instant, effortless solution for complying with ISP interception regulations.

## STAR-GATE™ ISP Compliance for Lawful Interception Regulations

- **Complete Access and Delivery** – STAR-GATE provides both the access of Internet protocols, and the delivery of intercepted data to any network site.
- **All IP Protocols** – STAR-GATE captures most IP applications including email, www, chat, and telnet; supporting each different interception criteria.
- **All Network Requirements** – STAR-GATE is a scalable solution that fits any network architecture, traffic, and security needs by readily adding appropriate access devices.
- **Complete Administration** – STAR-GATE offers local administration for regional ISPs, and Global System Administration for countrywide networks.

# STAR-GATE™

The easy way for operators  
to comply with Lawful Interception
