

# Glossaries Language Module: glossaries-magyar

Nicola Talbot

version 1.0 (2014-11-23)

This language module simply needs to be installed. The glossaries package will automatically load it if required.

## 1 The Code

### 1.1 glossaries-magyar-noenc.lfd

```
1 \@ifpackageloaded{polyglossia}%  
2 {%
```

This is unlikely to occur, since if polyglossia has been loaded then the glossaries-magyar-utf8.lfd file should've been loaded instead.
