

Usage

```

huex10stprobeset_dbconn()
huex10stprobeset_dbfile()
huex10stprobeset_dbschema(file="", show.indices=FALSE)
huex10stprobeset_dbInfo()

```

Arguments

<code>file</code>	A connection, or a character string naming the file to print to (see the <code>file</code> argument of the cat function for the details).
<code>show.indices</code>	The CREATE INDEX statements are not shown by default. Use <code>show.indices=TRUE</code> to get them.

Details

`huex10stprobeset_dbconn` returns a connection object to the package annotation DB. **IMPORTANT:** Don't call [dbDisconnect](#) on the connection object returned by `huex10stprobeset_dbconn` or you will break all the [AnnDbObj](#) objects defined in this package!

`huex10stprobeset_dbfile` returns the path (character string) to the package annotation DB (this is an SQLite file).

`huex10stprobeset_dbschema` prints the schema definition of the package annotation DB.

`huex10stprobeset_dbInfo` prints other information about the package annotation DB.

Value

`huex10stprobeset_dbconn`: a DBIConnection object representing an open connection to the package annotation DB.

`huex10stprobeset_dbfile`: a character string with the path to the package annotation DB.

`huex10stprobeset_dbschema`: none (invisible NULL).

`huex10stprobeset_dbInfo`: none (invisible NULL).
