

**NAME**

**nop** – pretty-print graph file

**SYNOPSIS**

**nop** [ **-p?** ] [ *files* ]

**DESCRIPTION**

**nop** reads a stream of graphs and prints each in pretty-printed (canonical) format on stdout. If no *files* are given, it reads from stdin.

**OPTIONS**

The following options are supported:

- p**      Produce no output - just check the input for valid DOT.
- ?**      Print usage information.

**EXIT STATUS**

If any errors occurred while processing any input, such as a file not found or a file containing illegal DOT, **EXIT\_FAILURE** is returned. Otherwise **EXIT\_SUCCESS** is returned.
