

# Package ‘rlog’

October 14, 2022

**Title** A Simple, Opinionated Logging Utility

**Version** 0.1.0

**Description** A very lightweight package that writes out log messages in an opinionated way. Simpler and lighter than other logging packages, 'rlog' provides a compact feature set that focuses on getting the job done in a Unix-like way.

## R topics documented:

log_debug . . . . .	2
log_error . . . . .	2
log_fatal . . . . .	3
log_info . . . . .	4
log_trace . . . . .	4
log_warn . . . . .	5
<b>Index</b>	<b>6</b>

---

log_debug	<i>Log a debug message</i>
-----------	----------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_debug(message)
```

**Arguments**

message	your message to log
---------	---------------------

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_debug("This is a debug message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_debug("This is a debug message")  
  
## End(Not run)
```

---

log_error	<i>Log an error message</i>
-----------	-----------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_error(message)
```

**Arguments**

message	your message to log
---------	---------------------

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_error("This is an error message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_error("This is an error message")  
  
## End(Not run)
```

---

<code>log_fatal</code>	<i>Log a fatal message</i>
------------------------	----------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_fatal(message)
```

**Arguments**

message            your message to log

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_fatal("This is a fatal message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_fatal("This is a fatal message")  
  
## End(Not run)
```

---

log_info	<i>Log an info message</i>
----------	----------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_info(message)
```

**Arguments**

message	your message to log
---------	---------------------

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_info("This is an info message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_info("This is an info message")  
  
## End(Not run)
```

---

log_trace	<i>Log a trace message</i>
-----------	----------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_trace(message)
```

**Arguments**

message	your message to log
---------	---------------------

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_trace("This is a trace message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_trace("This is a trace message")  
  
## End(Not run)
```

---

log_warn	<i>Log a warning message</i>
----------	------------------------------

---

**Description**

Log messages will only be emitted if the log priority matches or is higher than the priority of your message

**Usage**

```
log_warn(message)
```

**Arguments**

message            your message to log

**Value**

invisibly returns TRUE/FALSE

**Examples**

```
## Not run:  
log_warn("This is a warning message")  
Sys.setenv("LOG_LEVEL" = "TRACE")  
log_warn("This is a warning message")  
  
## End(Not run)
```
