

Package ‘tidylog’

May 8, 2024

Type Package

Title Logging for ‘dplyr’ and ‘tidyr’ Functions

Version 1.1.0

Description Provides feedback about ‘dplyr’ and ‘tidyr’ operations.

License MIT + file LICENSE

Imports dplyr, tidyverse, glue, cli, symbols, rlang (>= 0.4.3)

Suggests testthat, units, nycflights13, covr, forcats, knitr,
rmarkdown, bench

Encoding UTF-8

URL <https://github.com/elbersb/tidylog/>

BugReports <https://github.com/elbersb/tidylog/issues>

RoxygenNote 7.3.1

VignetteBuilder knitr

NeedsCompilation no

| | |
|--------------|----|
| Index | 39 |
|--------------|----|

| | |
|------------------|--|
| add_count | <i>Wrapper around dplyr::add_count that prints information about the operation</i> |
|------------------|--|

Description

Wrapper around dplyr::add_count that prints information about the operation

Usage

```
add_count(x, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see add_count |
| ... | see add_count |

Value

see [add_count](#)

add_tally

Wrapper around dplyr::add_tally that prints information about the operation

Description

Wrapper around dplyr::add_tally that prints information about the operation

Usage

```
add_tally(x, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see add_tally |
| ... | see add_tally |

Value

see [add_tally](#)

anti_join

Wrapper around dplyr::anti_join that prints information about the operation

Description

Wrapper around dplyr::anti_join that prints information about the operation

Usage

```
anti_join(x, y, by, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see anti_join |
| y | see anti_join |
| by | see anti_join |
| ... | see anti_join |

Value

see [anti_join](#)

| | |
|-------|--|
| count | <i>Wrapper around dplyr::count that prints information about the operation</i> |
|-------|--|

Description

Wrapper around dplyr::count that prints information about the operation

Usage

```
count(x, ...)
```

Arguments

| | |
|-----|---------------------------|
| x | see count |
| ... | see count |

Value

see [count](#)

| | |
|----------|---|
| distinct | <i>Wrapper around dplyr::distinct that prints information about the operation</i> |
|----------|---|

Description

Wrapper around dplyr::distinct that prints information about the operation

Usage

```
distinct(.data, ...)
```

Arguments

| | |
|-------|------------------------------|
| .data | see distinct |
| ... | see distinct |

Value

see [distinct](#)

| | |
|---------------------------|---|
| <code>distinct_all</code> | <i>Wrapper around dplyr::distinct_all that prints information about the operation</i> |
|---------------------------|---|

Description

Wrapper around dplyr::distinct_all that prints information about the operation

Usage

```
distinct_all(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see distinct_all |
| ... | see distinct_all |

Value

see [distinct_all](#)

| | |
|--------------------------|--|
| <code>distinct_at</code> | <i>Wrapper around dplyr::distinct_at that prints information about the operation</i> |
|--------------------------|--|

Description

Wrapper around dplyr::distinct_at that prints information about the operation

Usage

```
distinct_at(.tbl, ...)
```

Arguments

| | |
|------|---------------------------------|
| .tbl | see distinct_at |
| ... | see distinct_at |

Value

see [distinct_at](#)

| | |
|-------------|--|
| distinct_if | <i>Wrapper around dplyr::distinct_if that prints information about the operation</i> |
|-------------|--|

Description

Wrapper around dplyr::distinct_if that prints information about the operation

Usage

```
distinct_if(.tbl, ...)
```

Arguments

| | |
|------|---------------------------------|
| .tbl | see distinct_if |
| ... | see distinct_if |

Value

see [distinct_if](#)

| | |
|---------|--|
| drop_na | <i>Wrapper around tidyverse::drop_na that prints information about the operation</i> |
|---------|--|

Description

Wrapper around tidyverse::drop_na that prints information about the operation

Usage

```
drop_na(data, ...)
```

Arguments

| | |
|------|-----------------------------|
| data | see drop_na |
| ... | see drop_na |

Value

see [drop_na](#)

fill

Wrapper around tidyR::fill that prints information about the operation

Description

Wrapper around tidyR::fill that prints information about the operation

Usage

```
fill(data, ...)
```

Arguments

| | |
|------|--------------------------|
| data | see fill |
| ... | see fill |

Value

see [fill](#)

filter

Wrapper around dplyr::filter that prints information about the operation

Description

Wrapper around dplyr::filter that prints information about the operation

Usage

```
filter(.data, ...)
```

Arguments

| | |
|-------|----------------------------|
| .data | see filter |
| ... | see filter |

Value

see [filter](#)

filter_all

Wrapper around dplyr::filter_all that prints information about the operation

Description

Wrapper around dplyr::filter_all that prints information about the operation

Usage

```
filter_all(.tbl, ...)
```

Arguments

| | |
|------|--------------------------------|
| .tbl | see filter_all |
| ... | see filter_all |

Value

see [filter_all](#)

filter_at

Wrapper around dplyr::filter_at that prints information about the operation

Description

Wrapper around dplyr::filter_at that prints information about the operation

Usage

```
filter_at(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see filter_at |
| ... | see filter_at |

Value

see [filter_at](#)

filter_if

Wrapper around dplyr::filter_if that prints information about the operation

Description

Wrapper around dplyr::filter_if that prints information about the operation

Usage

```
filter_if(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see filter_if |
| ... | see filter_if |

Value

see [filter_if](#)

full_join

Wrapper around dplyr::full_join that prints information about the operation

Description

Wrapper around dplyr::full_join that prints information about the operation

Usage

```
full_join(x, y, by, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see full_join |
| y | see full_join |
| by | see full_join |
| ... | see full_join |

Value

see [full_join](#)

gather

Wrapper around tidyR::gather that prints information about the operation

Description

Wrapper around tidyR::gather that prints information about the operation

Usage

```
gather(data, ...)
```

Arguments

| | |
|------|----------------------------|
| data | see gather |
| ... | see gather |

Value

see [gather](#)

group_by

Wrapper around dplyr::group_by that prints information about the operation

Description

Wrapper around dplyr::group_by that prints information about the operation

Usage

```
group_by(.data, ...)
```

Arguments

| | |
|-------|------------------------------|
| .data | see group_by |
| ... | see group_by |

Value

see [group_by](#)

`group_by_all`

Wrapper around dplyr::group_by_all that prints information about the operation

Description

Wrapper around dplyr::group_by_all that prints information about the operation

Usage

```
group_by_all(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see group_by_all |
| ... | see group_by_all |

Value

see [group_by_all](#)

`group_by_at`

Wrapper around dplyr::group_by_at that prints information about the operation

Description

Wrapper around dplyr::group_by_at that prints information about the operation

Usage

```
group_by_at(.tbl, ...)
```

Arguments

| | |
|------|---------------------------------|
| .tbl | see group_by_at |
| ... | see group_by_at |

Value

see [group_by_at](#)

group_by_if

Wrapper around dplyr::group_by_if that prints information about the operation

Description

Wrapper around dplyr::group_by_if that prints information about the operation

Usage

```
group_by_if(.tbl, ...)
```

Arguments

| | |
|------|---------------------------------|
| .tbl | see group_by_if |
| ... | see group_by_if |

Value

see [group_by_if](#)

inner_join

Wrapper around dplyr::inner_join that prints information about the operation

Description

Wrapper around dplyr::inner_join that prints information about the operation

Usage

```
inner_join(x, y, by, ...)
```

Arguments

| | |
|-----|--------------------------------|
| x | see inner_join |
| y | see inner_join |
| by | see inner_join |
| ... | see inner_join |

Value

see [inner_join](#)

left_join

Wrapper around dplyr::left_join that prints information about the operation

Description

Wrapper around dplyr::left_join that prints information about the operation

Usage

```
left_join(x, y, by, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see left_join |
| y | see left_join |
| by | see left_join |
| ... | see left_join |

Value

see [left_join](#)

mutate

Wrapper around dplyr::mutate that prints information about the operation

Description

Wrapper around dplyr::mutate that prints information about the operation

Usage

```
mutate(.data, ...)
```

Arguments

| | |
|-------|----------------------------|
| .data | see mutate |
| ... | see mutate |

Value

see [mutate](#)

`mutate_all`

Wrapper around dplyr::mutate_all that prints information about the operation

Description

Wrapper around dplyr::mutate_all that prints information about the operation

Usage

`mutate_all(.tbl, ...)`

Arguments

| | |
|-------------------|--------------------------------|
| <code>.tbl</code> | see mutate_all |
| <code>...</code> | see mutate_all |

Value

see [mutate_all](#)

`mutate_at`

Wrapper around dplyr::mutate_at that prints information about the operation

Description

Wrapper around dplyr::mutate_at that prints information about the operation

Usage

`mutate_at(.tbl, ...)`

Arguments

| | |
|-------------------|-------------------------------|
| <code>.tbl</code> | see mutate_at |
| <code>...</code> | see mutate_at |

Value

see [mutate_at](#)

mutate_if

Wrapper around dplyr::mutate_if that prints information about the operation

Description

Wrapper around dplyr::mutate_if that prints information about the operation

Usage

```
mutate_if(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see mutate_if |
| ... | see mutate_if |

Value

see [mutate_if](#)

pivot_longer

Wrapper around tidyr::pivot_longer that prints information about the operation

Description

Wrapper around tidyr::pivot_longer that prints information about the operation

Usage

```
pivot_longer(data, ...)
```

Arguments

| | |
|------|----------------------------------|
| data | see pivot_longer |
| ... | see pivot_longer |

Value

see [pivot_longer](#)

pivot_wider

Wrapper around tidyverse::pivot_wider that prints information about the operation

Description

Wrapper around tidyverse::pivot_wider that prints information about the operation

Usage

```
pivot_wider(data, ...)
```

Arguments

| | |
|------|---------------------------------|
| data | see pivot_wider |
| ... | see pivot_wider |

Value

see [pivot_wider](#)

relocate

Wrapper around dplyr::relocate that prints information about the operation

Description

Wrapper around dplyr::relocate that prints information about the operation

Usage

```
relocate(.data, ...)
```

Arguments

| | |
|-------|------------------------------|
| .data | see relocate |
| ... | see relocate |

Value

see [relocate](#)

| | |
|--------|---|
| rename | <i>Wrapper around dplyr::rename that prints information about the operation</i> |
|--------|---|

Description

Wrapper around dplyr::rename that prints information about the operation

Usage

```
rename(.data, ...)
```

Arguments

| | |
|-------|----------------------------|
| .data | see rename |
| ... | see rename |

Value

see [rename](#)

| | |
|------------|---|
| rename_all | <i>Wrapper around dplyr::rename_all that prints information about the operation</i> |
|------------|---|

Description

Wrapper around dplyr::rename_all that prints information about the operation

Usage

```
rename_all(.tbl, ...)
```

Arguments

| | |
|------|--------------------------------|
| .tbl | see rename_all |
| ... | see rename_all |

Value

see [rename_all](#)

rename_at

Wrapper around dplyr::rename_at that prints information about the operation

Description

Wrapper around dplyr::rename_at that prints information about the operation

Usage

```
rename_at(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see rename_at |
| ... | see rename_at |

Value

see [rename_at](#)

rename_if

Wrapper around dplyr::rename_if that prints information about the operation

Description

Wrapper around dplyr::rename_if that prints information about the operation

Usage

```
rename_if(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see rename_if |
| ... | see rename_if |

Value

see [rename_if](#)

| | |
|-------------|--|
| rename_with | <i>Wrapper around dplyr::rename_with that prints information about the operation</i> |
|-------------|--|

Description

Wrapper around dplyr::rename_with that prints information about the operation

Usage

```
rename_with(.data, ...)
```

Arguments

| | |
|-------|---------------------------------|
| .data | see rename_with |
| ... | see rename_with |

Value

see [rename_with](#)

| | |
|------------|---|
| replace_na | <i>Wrapper around tidyr::replace_na that prints information about the operation</i> |
|------------|---|

Description

Wrapper around tidyr::replace_na that prints information about the operation

Usage

```
replace_na(data, ...)
```

Arguments

| | |
|------|--------------------------------|
| data | see replace_na |
| ... | see replace_na |

Value

see [replace_na](#)

right_join

Wrapper around dplyr::right_join that prints information about the operation

Description

Wrapper around dplyr::right_join that prints information about the operation

Usage

```
right_join(x, y, by, ...)
```

Arguments

| | |
|-----|----------------|
| x | see right_join |
| y | see right_join |
| by | see right_join |
| ... | see right_join |

Value

see [right_join](#)

sample_frac

Wrapper around dplyr::sample_frac that prints information about the operation

Description

Wrapper around dplyr::sample_frac that prints information about the operation

Usage

```
sample_frac(tbl, ...)
```

Arguments

| | |
|-----|-----------------|
| tbl | see sample_frac |
| ... | see sample_frac |

Value

see [sample_frac](#)

sample_n

Wrapper around dplyr::sample_n that prints information about the operation

Description

Wrapper around dplyr::sample_n that prints information about the operation

Usage

```
sample_n(tbl, ...)
```

Arguments

| | |
|-----|------------------------------|
| tbl | see sample_n |
| ... | see sample_n |

Value

see [sample_n](#)

select

Wrapper around dplyr::select that prints information about the operation

Description

Wrapper around dplyr::select that prints information about the operation

Usage

```
select(.data, ...)
```

Arguments

| | |
|-------|----------------------------|
| .data | see select |
| ... | see select |

Value

see [select](#)

select_all

Wrapper around dplyr::select_all that prints information about the operation

Description

Wrapper around dplyr::select_all that prints information about the operation

Usage

select_all(.tbl, ...)

Arguments

| | |
|------|--------------------------------|
| .tbl | see select_all |
| ... | see select_all |

Value

see [select_all](#)

select_at

Wrapper around dplyr::select_at that prints information about the operation

Description

Wrapper around dplyr::select_at that prints information about the operation

Usage

select_at(.tbl, ...)

Arguments

| | |
|------|-------------------------------|
| .tbl | see select_at |
| ... | see select_at |

Value

see [select_at](#)

`select_if`

Wrapper around dplyr::select_if that prints information about the operation

Description

Wrapper around dplyr::select_if that prints information about the operation

Usage

```
select_if(.tbl, ...)
```

Arguments

| | |
|------|-------------------------------|
| .tbl | see select_if |
| ... | see select_if |

Value

see [select_if](#)

`semi_join`

Wrapper around dplyr::semi_join that prints information about the operation

Description

Wrapper around dplyr::semi_join that prints information about the operation

Usage

```
semi_join(x, y, by, ...)
```

Arguments

| | |
|-----|-------------------------------|
| x | see semi_join |
| y | see semi_join |
| by | see semi_join |
| ... | see semi_join |

Value

see [semi_join](#)

separate_wider_delim *Wrapper around tidyr::separate_wider_delim that prints information about the operation*

Description

Wrapper around tidyr::separate_wider_delim that prints information about the operation

Usage

```
separate_wider_delim(data, ...)
```

Arguments

| | |
|------|--|
| data | see separate_wider_delim |
| ... | see separate_wider_delim |

Value

see [separate_wider_delim](#)

separate_wider_position

Wrapper around tidyr::separate_wider_position that prints information about the operation

Description

Wrapper around tidyr::separate_wider_position that prints information about the operation

Usage

```
separate_wider_position(data, ...)
```

Arguments

| | |
|------|---|
| data | see separate_wider_position |
| ... | see separate_wider_position |

Value

see [separate_wider_position](#)

`separate_wider_regex` *Wrapper around tidyverse::separate_wider_regex that prints information about the operation*

Description

Wrapper around tidyverse::separate_wider_regex that prints information about the operation

Usage

```
separate_wider_regex(data, ...)
```

Arguments

| | |
|-------------------|--|
| <code>data</code> | see separate_wider_regex |
| <code>...</code> | see separate_wider_regex |

Value

see [separate_wider_regex](#)

`slice` *Wrapper around dplyr::slice that prints information about the operation*

Description

Wrapper around dplyr::slice that prints information about the operation

Usage

```
slice(.data, ...)
```

Arguments

| | |
|--------------------|---------------------------|
| <code>.data</code> | see slice |
| <code>...</code> | see slice |

Value

see [slice](#)

`slice_head`

Wrapper around dplyr::slice_head that prints information about the operation

Description

Wrapper around dplyr::slice_head that prints information about the operation

Usage

`slice_head(.data, ...)`

Arguments

.data see [slice_head](#)
... see [slice_head](#)

Value

see [slice_head](#)

`slice_max`

Wrapper around dplyr::slice_max that prints information about the operation

Description

Wrapper around dplyr::slice_max that prints information about the operation

Usage

`slice_max(.data, ...)`

Arguments

.data see [slice_max](#)
... see [slice_max](#)

Value

see [slice_max](#)

slice_min

Wrapper around dplyr::slice_min that prints information about the operation

Description

Wrapper around dplyr::slice_min that prints information about the operation

Usage

```
slice_min(.data, ...)
```

Arguments

| | |
|-------|-------------------------------|
| .data | see slice_min |
| ... | see slice_min |

Value

see [slice_min](#)

slice_sample

Wrapper around dplyr::slice_sample that prints information about the operation

Description

Wrapper around dplyr::slice_sample that prints information about the operation

Usage

```
slice_sample(.data, ...)
```

Arguments

| | |
|-------|----------------------------------|
| .data | see slice_sample |
| ... | see slice_sample |

Value

see [slice_sample](#)

slice_tail

Wrapper around dplyr::slice_tail that prints information about the operation

Description

Wrapper around dplyr::slice_tail that prints information about the operation

Usage

```
slice_tail(.data, ...)
```

Arguments

| | |
|-------|--------------------------------|
| .data | see slice_tail |
| ... | see slice_tail |

Value

see [slice_tail](#)

spread

Wrapper around tidyr::spread that prints information about the operation

Description

Wrapper around tidyr::spread that prints information about the operation

Usage

```
spread(data, ...)
```

Arguments

| | |
|------|----------------------------|
| data | see spread |
| ... | see spread |

Value

see [spread](#)

summarise

Wrapper around dplyr::summarise that prints information about the operation

Description

Wrapper around dplyr::summarise that prints information about the operation

Usage

```
summarise(.data, ...)
```

Arguments

| | |
|-------|-------------------------------|
| .data | see summarise |
| ... | see summarise |

Value

see [summarise](#)

summarise_all

Wrapper around dplyr::summarise_all that prints information about the operation

Description

Wrapper around dplyr::summarise_all that prints information about the operation

Usage

```
summarise_all(.tbl, ...)
```

Arguments

| | |
|------|-----------------------------------|
| .tbl | see summarise_all |
| ... | see summarise_all |

Value

see [summarise_all](#)

summarise_at

Wrapper around dplyr::summarise_at that prints information about the operation

Description

Wrapper around dplyr::summarise_at that prints information about the operation

Usage

```
summarise_at(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see summarise_at |
| ... | see summarise_at |

Value

see [summarise_at](#)

summarise_if

Wrapper around dplyr::summarise_if that prints information about the operation

Description

Wrapper around dplyr::summarise_if that prints information about the operation

Usage

```
summarise_if(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see summarise_if |
| ... | see summarise_if |

Value

see [summarise_if](#)

`summarize`

Wrapper around dplyr::summarize that prints information about the operation

Description

Wrapper around dplyr::summarize that prints information about the operation

Usage

```
summarize(.data, ...)
```

Arguments

| | |
|-------|-------------------------------|
| .data | see summarize |
| ... | see summarize |

Value

see [summarize](#)

`summarize_all`

Wrapper around dplyr::summarize_all that prints information about the operation

Description

Wrapper around dplyr::summarize_all that prints information about the operation

Usage

```
summarize_all(.tbl, ...)
```

Arguments

| | |
|------|-----------------------------------|
| .tbl | see summarize_all |
| ... | see summarize_all |

Value

see [summarize_all](#)

summarize_at

Wrapper around dplyr::summarize_at that prints information about the operation

Description

Wrapper around dplyr::summarize_at that prints information about the operation

Usage

```
summarize_at(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see summarize_at |
| ... | see summarize_at |

Value

see [summarize_at](#)

summarize_if

Wrapper around dplyr::summarize_if that prints information about the operation

Description

Wrapper around dplyr::summarize_if that prints information about the operation

Usage

```
summarize_if(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see summarize_if |
| ... | see summarize_if |

Value

see [summarize_if](#)

tally

Wrapper around dplyr::tally that prints information about the operation

Description

Wrapper around dplyr::tally that prints information about the operation

Usage

```
tally(x, ...)
```

Arguments

| | |
|-----|---------------------------|
| x | see tally |
| ... | see tally |

Value

see [tally](#)

tidylog

outputs some information about the data frame/tbl

Description

outputs some information about the data frame/tbl

Usage

```
tidylog(.data)
```

Arguments

| | |
|-------|------------------|
| .data | a tbl/data frame |
|-------|------------------|

Value

same as .data

Examples

```
tidylog(mtcars)
#> tidylog: data.frame with 32 rows and 11 columns
```

top_frac

Wrapper around dplyr::top_frac that prints information about the operation

Description

Wrapper around dplyr::top_frac that prints information about the operation

Usage

`top_frac(x, ...)`

Arguments

| | |
|-----|------------------------------|
| x | see top_frac |
| ... | see top_frac |

Value

see [top_frac](#)

top_n

Wrapper around dplyr::top_n that prints information about the operation

Description

Wrapper around dplyr::top_n that prints information about the operation

Usage

`top_n(x, ...)`

Arguments

| | |
|-----|---------------------------|
| x | see top_n |
| ... | see top_n |

Value

see [top_n](#)

transmute

Wrapper around dplyr::transmute that prints information about the operation

Description

Wrapper around dplyr::transmute that prints information about the operation

Usage

```
transmute(.data, ...)
```

Arguments

| | |
|-------|-------------------------------|
| .data | see transmute |
| ... | see transmute |

Value

see [transmute](#)

transmute_all

Wrapper around dplyr::transmute_all that prints information about the operation

Description

Wrapper around dplyr::transmute_all that prints information about the operation

Usage

```
transmute_all(.tbl, ...)
```

Arguments

| | |
|------|-----------------------------------|
| .tbl | see transmute_all |
| ... | see transmute_all |

Value

see [transmute_all](#)

| | |
|--------------|---|
| transmute_at | <i>Wrapper around dplyr::transmute_at that prints information about the operation</i> |
|--------------|---|

Description

Wrapper around dplyr::transmute_at that prints information about the operation

Usage

```
transmute_at(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see transmute_at |
| ... | see transmute_at |

Value

see [transmute_at](#)

| | |
|--------------|---|
| transmute_if | <i>Wrapper around dplyr::transmute_if that prints information about the operation</i> |
|--------------|---|

Description

Wrapper around dplyr::transmute_if that prints information about the operation

Usage

```
transmute_if(.tbl, ...)
```

Arguments

| | |
|------|----------------------------------|
| .tbl | see transmute_if |
| ... | see transmute_if |

Value

see [transmute_if](#)

| | |
|---------|--|
| uncount | <i>Wrapper around tidyR::uncount that prints information about the operation</i> |
|---------|--|

Description

Wrapper around tidyR::uncount that prints information about the operation

Usage

```
uncount(data, ...)
```

Arguments

| | |
|------|-----------------------------|
| data | see uncount |
| ... | see uncount |

Value

see [uncount](#)

| | |
|---------|--|
| ungroup | <i>Wrapper around dplyr::ungroup that prints information about the operation</i> |
|---------|--|

Description

Wrapper around dplyr::ungroup that prints information about the operation

Usage

```
ungroup(x, ...)
```

Arguments

| | |
|-----|-----------------------------|
| x | see ungroup |
| ... | see ungroup |

Value

see [ungroup](#)
